Click Next Step 2: Insert your office account username and password into the dialog box that appears Step 3: Confirm the account credentials and continue Step 4: Configure Outlook to display messages from the new mailbox Step 5: Receive an email from your new account that includes a link to activate Office Step 6: Use the link to the Office 365 website Step 7: Click the link and follow instructions to access the Office site and activate your account Step 8: After activating Office 365, return to the Outlook client and check to see that you now have a new mailbox at office.com.Q: How to find the largest contiguous substring of consecutive characters that contains a given character? I have an input like word = "ABC AAA BBB ABC AAA BBB ABC" and I want to find a contiguous substring of consecutive letters that contain 'B' which length is greater than 1 and contains 'B' and the result is : max_substring = "BBBAB" How can I do that in Java? A: Try something like this: String input = "ABC AAA BBB ABC AAA BBB ABC"; String subStr = ""; for (int i = 0; i < input.length(); i++) { if (input.charAt(i) == 'B') { subStr = input.substring(i - 1, i); } } System.out.println(subStr); The human glial cell line SGW293; a cell line with glial properties but neither astrocytes nor oligodendrocytes. We report the generation of a clonal cell line, named SGW293, from human oligodendro 82157476af
