I usually skip walking sims horror games or horror game where you can't defend yourself but i can't resist the black & white style, Noir setting, and the locked angel camera. White Night story and gameplay is a bit "meh" and interesting at the same time that you can complete in around 4-6 hours or less if you know exactly what to do. also Clair De Lune is one of the amazing soundtracks in the game. the game is surprisingly good but there is no reason to jump back in the game once you complete it.
